6. "PRELIMINARY AMENDMENT B" COM April 23, 1998

TRAVERSE OF RESTRICTION REQUIREMENT

This application is a proper national stage PCT international application under U.S.C. 371(c). Attached is the above (5.) FORM PCT/DO/EO/903 which I certify to be a true copy of the original.

B

Issues regarding plural inventions are to be addressed under international "unity of invention." A "corresponding technical relationship", rather than "independence and distinctness" is here at issue. As such, U.S.C. 121 is not applicable in this case.

### ERRORS IN EXAMINER ACTION

In addition to the above, it is unclear which claims are being addressed in the requirement. Claims 1 - 90 are cited, but the subject matter latter addressed is more indicative of a later set of amended claims 1 - 54.

Nor is it certain which set of claims belong to which restricted group, as the requirement fails to identify the claims by number.

The requirement also fails to cite features, or reasoning in support of allegations of plurality.

### APPLICANT PROVISIONAL ELECTION OF SPECIES

Claims directed to medical uses/treatment of infectious disease (a.).

Respectfully,
